The Late Elections

Having resented to the entire satisfaction of the
successful candidates, and, the undersigned, prop-
rietor of the

Cheap Side Hardware Store.

Having demonstrated the fact that his customers
get nearer the worth of their money than the
patrons of any house on the Eastern Slope, or else-
where in Greencastle, he proposes to fight it out
this time if it takes all summer, and only asks
those desiring to select from the largest and best
assortment of

Stoves, Hardware and Tinware

In this city, at greatly reduced prices, to call and
assess their own interests by making purchases of
him.

G. D. BLAKEY.

The Champion Reaper and Mower.

The highest draught, best made, most convenient
and durable machine in the world, for sale by
G. D. BLAKEY.

Clothes Wringers.

mountains, at

COOK'S

DRUG STORE,

18, West Side Public Square.

Bear in mind that the Wall Paper sold at Cook's
is trimmed without extra charge
to the customer.

Lime! Lime!

We would say to all our customers that we still
keep a good supply of LIME, and will increase our
facilities to meet the wants of the trade.

To those who have never used our lime, we would
call their attention to the fact that it is the best lime
that is made in Central Indiana. It is
burnt from the finest white or blue limestone, and
contains no sand, iron, or other impurities. Masons
and plasterers who have used it say that one barrel
will go as far as one and a half barrels of ordinary
lime, and makes a much smoother and
whiter finish.

WILSON'S MILLERS SOUTHWEST OF CLOVER-
DALE, near Bowling Green road.

We charge 20 cents per barrel at Kith; deliver at
Cloverdale for 25 cents, by the car load, in less quan-
tities, 30 cents or barrels may be furnished.

Orders solicited. Satisfaction guaranteed.

Terms, Cash on delivery.

GREENCASTLE BANNER. G. J. LANGSDALE, Editor. GREENCASTLE, IND. THURSDAY, AUGUST 4, 1870.

Gen. Coburn's Appointments

In this county are as follows:

Bainbridge, Tuesday, August 9th, 7 p. m.

Russellville, Wednesday, Aug. 10th, 7 p. m.

Morton, Thursday, August 11th, 7 p. m.

Mr. Meridian, Friday, August 12th, 2 p. m.

Greencastle, Saturday, August 13th, 2 p. m.

It will be seen that M. A. Osborn still manifests a determination to force a personal controversy with the editor of this paper, and does so, we presume, in order to divert attention from the real point at issue. To make it clear just how we stand, we will go back over the ground a little:

1. Two weeks after the action of the Committee nominating Osborn for Joint Representative, we published a statement of W. A. Brown, the Chairman, in which he gave the resolution as it passed the Committee. At the same time we published an article from "Fair Play" criticising this action, and we gave it a place in our columns simply because he had been deprived of his rights in having a voice in making the nomination. He had been choked off there, but he could not be here, because this paper is published in behalf of the rights of the people, be they "leading men," humble men, professional men, merchants, mechanics or farmers. As between man and man, we know no difference. 2. The next week we had an announcement from Capt. Martin, stating that he would be a candidate for the office of Joint Representative, subject to a Republican Convention, should one be held. 3. On the following week came a card from Capt. Osborn stating that he had been nominated by the proper authority, and that he would make the race on that nomination. 4. The next week we had a card from Capt. Martin, announcing that he would continue to make the race, and also a second communication from "Fair Play," making charges of unfairness against those who had thus far managed the affair. On this we spoke, and it is the first thing we said on the subject. We did so for the reason that we thought it better to have one candidate in the field than two, and because we saw that, as it stood, the party would be speedily disorganized. Therefore we urged that a convention be called and the nomination made in the regular way, thus settling all disputes. For having done what we conceived to be our duty in this respect, we were attacked by Capt. Osborn the following week, by an article wherein he sought to make us a party to "Fair Play's" communication in regard to this paper which was untrue. This we repelled as it deserved, and for having thus defended ourselves, we are again attacked by Mr. Osborn this week. His short article appears elsewhere, and abounds in personal abuse in no way relating to the questions under consideration. Its publication is the only reply we have to make to his opening paragraph.

It is fair to presume that this paper is published in the interest of the Republican party, but it is not fair to presume that it is published in the interest of any set of men who propose to control the party for their individual benefit. Mr. Osborn does not seem able to comprehend the distinction, although it is very marked.

The reference to an "endorsement" means just this: We borrowed a sum of money early in 1868, for the purpose of putting improved material into the BANNER office, for which we paid 12 per cent. interest. Mr. Osborn and several other persons endorsed our note—his proportionate share being fifty dollars—for which we gave them a mortgage on property worth four times the amount, at the same time binding ourselves not to run away, and transferring to them a policy of insurance, so as to make them secure against every emergency. We are now reminded by Mr. Osborn that, for this, we were expected to sell our principles and our independence, and become his willing tool. In this he made another mistake. We hold ourselves ready at all times to repay that "endorsement," in kind, but this does not require us to violate our duty to the Republican party or to ourselves.

The insinuation that we are seeking to be a candidate, or that we have a candidate, is ludicrous, and we beg to disabuse his mind of all such fears. We have got along thus far without seeking office, and we

hope to be able to continue to do so. The accusation of Mr. Osborn comes with a bad grace from one who has constantly held office since we have known him, against one who has never sought nor held a civil office. And as to having a candidate, we can only reiterate what we said last week—we have no candidate, nor do we propose to have one until the people have made the selection.

Last week we expressed the belief that Osborn's nomination had been arranged at Indianapolis, on the day that the Congressional Convention met. This belief was founded on the statement of W. M. Ridpath, one of the delegates, to a gentleman in this city, but he now says that when he made it he was only "joking." We are glad to hear it, because we have a high opinion of the gentlemen who were there.

In his former article, Mr. Osborn referred, for his vindication on the Morgan Raid bill, to his record as found in the House Journal. This seems to be no longer sufficient to shield him, and he now seeks refuge behind Gov. Morton, Gov. Baker, and the Legislature of 1867. When that body acted on this question, and when Govs. Morton and Baker expressed themselves in favor of paying the Morgan Raid claims, it was supposed that they were yet in the hands of the original holders. But after the introduction of the bill, and before it was brought to a vote, the fact was brought to light that the claims had passed into the hands of speculators, and it was strongly opposed by many newspapers on this ground alone. But admitting—which we do not—that Mr. Osborn did not make this discovery until after his vote was cast for it, and that he then went to the Senate and attempted its defeat by attaching amendments to it—does it not look like a very strange proceeding? Why this remarkable secrecy? If he had discovered that the bill was a fraud, would it not have been more in accordance with his duties as a Legislator to have exposed the matter to the Senate and secured its defeat outright? That he did not do so looks very suspicious; in fact it looks as though he dared not to openly oppose the bill.

We are astonished to hear that if the bill "had any party features, that were Republican," and that we will not have any more such "Republican" measures soon. The public understood at the time that it was a pet bill of the Democratic members of the Legislature, and that the delay in the House in taking up the Senate message returning it with amendments, was a maneuver of the Republican members to force the Democrats to a vote on the 15th Amendment, and that it in no way related to the merits of the bill.

It is Mr. Osborn that attacks Govs. Morton and Baker, not us. To defend himself he places them on the record in favor of the Morgan Raid bill, and leaves them there. Those gentlemen will certainly not be thankful to him for being placed in this unfavorable position. And this sort of defense reminds us of the remark of Willis G. Neff, when he announced his intention of doing just as Joe McDonald told him to. Our Representatives should show a little more independence of mind and action, and should hold themselves responsible only to their constituents. It is the only way in which we can have correct legislation.

In conclusion, we would say to Mr. Osborn that the "arbitrary rule" of which he complains, was intended to protect him from the further attacks of anonymous correspondents, to whom it alone applies. If he is still unsatisfied, and wishes to continue his personal attacks on us, it will give us great pleasure to publish his communications, although it may require a vast outlay of ink, paper, printer's sweat, money and "gratitude." If he can stand it, we can. But, while he is about it, we would like him to give the secret history of the defeat of the Prison Reform bill. That would be interesting reading. And if he wishes us to believe his assertion that he will never be found trying to disorganize the party, let him at once abandon a position which has already done the party much harm, and which will do more in the future if persevered in.

The Democracy of the Eighth District have nominated Captain Will C. Moreau as their candidate for Congress. This is the worst nomination ever known in the history of this idiotic Bourbon organization. That our readers may know the character of the man, we present the following order from Gen. Thomas, which we heard read by his regiment while on dress parade near Adairsville, Georgia, and which was received by cheer after cheer by the men in the ranks. All officers and men, expressed the most unbounded delight. Here it is:

Order in Duty of the (General),
(Chattanooga, Tenn., April 26, 1864.)
GENERAL ORDER, No. 27.
The following officers have been dishonorably dismissed from the service for various offenses, their names are now published for the information of this army.

Captain Will C. Moreau, 3d Cavalry, from January 1st, 1864, for having transferred his regiment while under charges for obtaining money under false pretenses, and for conducting himself as an officer and gentleman, and having twice absconded from this Department to avoid a trial upon these charges.

W. D. M. MAJ. GENERAL THOMAS,
Assistant Adjutant General.

Official: W. M. McRAE,
Assistant Adjutant General.

We have a communication from "Justice," replying to the attacks made on Capt. Martin last week, which says—

"H. B. Martin supported Douglass in 1860, and fought Breckinridge men much harder than Republicans did at that time. He enlisted in the army as a private at the beginning of the war, and obtained his promotion by hard and meritorious service. Since 1860 he has been an active Republican, as the people of Putnam county well know, and has been a candidate for office before them but once."

The remainder of the article is devoted to a ventilation of M. A. Osborn, and does not appear from the fact that we hope all parties will see the necessity of referring the matter under dispute to the proper tribunal in order that peace and harmony may prevail.

A Live Issue.

Secretary Boutwell announces the reduction in the amount of the public debt for the month of July to be \$17,034,123! Since the first of March, the present year, the aggregate reduction has amounted to \$69,040,171!

The Indianapolis Exposition of Textile Fabrics was informally opened yesterday morning. A large number of exhibitors and visitors were present.

COMMUNICATIONS.

From Capt. Osborn.

Mr. Editor:—The arbitrary rule you lay down in your last issue to publish no reply to your three columns which you devote to an ingenious perversion of facts, would exclude me from answering the unfair and unkind personalities which you have been pleased to publish, if I desired to do so. Your article, coming from the editor of a paper who is fair to pretensions, is the interest of the party supporting the paper, will surprise many who have encouraged the publication of it, and your attack upon those by whose endorsement and aid you have been enabled to sustain your paper is an evidence of ingratitude which is not usually found in your profession. The attack which you make upon me is an attack also upon Governor Morton, Governor Baker, the Republican Legislatures of 1867 and 1869, a Republican Commission appointed to investigate the Morgan Raid claims, and a great many prominent Republicans in the State of Ohio. Governor Morton, in his message of 1865, urged an appropriation to pay the Morgan Raid claims. Governor Baker, in his message to the Legislature of 1869, after giving a history of the claims, and the action taken by the Legislature of 1867 and the Commission raised by that Legislature to investigate, says: "My own opinion as to the propriety of the State of Ohio paying relief to the sufferers by the Morgan Raid has long since been publicly expressed in the performance of my official duties. I have subsequently discovered no good reason to change that opinion. I adopt the language of my immediate predecessor (Governor Morton) on this subject, addressed to the General Assembly of 1865, by saying that the true theory of our government is that it shall protect the people in their persons and property against invasion and loss from the public enemy, or injury by domestic insurrection. When losses have been sustained, it is much easier for the people of the State to bear them in their collective capacity than for the particular individuals on whom they have fallen."

John I. Morrison, of Marion county, Smith Vawter, of Jennings county, and Col. John W. McCray, of Monroe county, distinguished Republicans of the State, with General Thomas Brown, present District Attorney of the United States for this State, spent about six months in investigating the Morgan Raid claims, authorized by the Republican Legislature of 1869, and made their report through Governor Baker to the Legislature of 1869, and recommended the appropriation by the Legislature. A bill was offered, in pursuance of all these official recommendations; it was referred to a committee in the House, a majority of whom were Republicans; they reported in favor of the bill, and the bill passed. In the House, I found the following Republicans favoring the bill: Baker, Barnett, Bowen, Chapman, Dunn, Hamilton, Johnson of Parke, Kerechval, Miller, Monroe, Overmyer, Pierce of Porter, Pierce of Vigo, Ratliff, Stewart of Ohio, Williams of St. Joseph, Wilson of the Superior of the House, Burk and others, and in the Senate many Republican Senators sustaining Governor Morton and Governor Baker in their view upon the measure. Besides these, many prominent Republicans in the State expressed the opinion that the bill ought to pass. At the time the bill was pending in the House, a Commission appointed by the General Government, and composed of Congressmen, were sitting in Indianapolis to ascertain and allow claims of the State upon the United States, growing out of the war. We were told that this Commission would allow to the State all sums paid out to sufferers by the Morgan Raid, as had been done in Ohio. This induced me to offer the resolution which you printed in your three column article, and which I offered to John Gilmore and the rest of the Republican ticket, and I am not ashamed to say that I offered it. But, if I am correctly informed, Capt. Osborn was nominated in 62 to fill a vacancy, and John Gilmore in 63 to supply a place made vacant by a member of the ticket "resigning under charges," and the Central Committee never made an original nomination until six sixteenths of it presented to do so the 18th of June last.

Capt. Osborn finally, in evidence of temper, talks about those who "seek" Democratic votes and counsel with Democrats to become their candidate. It is well known that my name, as well as several other gentlemen, had been used by our respective friends in connection with the position of Joint Representative, long before the June election. But, as I have said, I had no anxiety so far as my aspirations were concerned. I supposed the usual course of calling a convention of the people to name a candidate, would be pursued by the Central Committee. I did not contemplate making any canvass to secure the nomination, and felt disposed to let things take their course and abide by the result. But, as I have said, I had no anxiety so far as my aspirations were concerned. I supposed the usual course of calling a convention of the people to name a candidate, would be pursued by the Central Committee. I did not contemplate making any canvass to secure the nomination, and felt disposed to let things take their course and abide by the result. But, as I have said, I had no anxiety so far as my aspirations were concerned. I supposed the usual course of calling a convention of the people to name a candidate, would be pursued by the Central Committee. I did not contemplate making any canvass to secure the nomination, and felt disposed to let things take their course and abide by the result.

I am not vain enough to suppose that I am the only one who is disappointed by the action of the Junta that nominated him, for me, nor am I certain that a majority of the District would favor my nomination, but I firmly believe that two-thirds of the Republicans of Putnam county are against him; not only on account of the indecent manner in which he thrust himself upon them as a candidate, but also because his course in the last Legislature was not satisfactory.

All that I have asked and all that I now ask, is that the people of the party may have a fair opportunity to express their preference, and will abide the result. But I here reiterate my determination, that unless such an opportunity is given I shall carry the election to the polls. And while I have not consulted with Democrats to be their candidate, and am firm in the political faith of the Republican party, I may here say, that I am not seeking to be a legislator that I may use the position to advance mere party or private interests, but that I may, to the best of my ability, legislate in behalf of the prosperity and interest of the whole people. Respectfully, &c.

From W. A. Brown.

As one of the Central Committee, I have to say, that in calling the meeting of June 18th last, besides inserting a notice of it in the BANNER, I addressed a letter to each member of the Committee, urging the importance of his attending the meeting.

Prior to the meeting, the Republicans from all parts of the county urged upon the Committee that there should be no convention for nominating a county ticket.

There were present at the meeting, Messrs. Biddle, Craig, Darnall, Smith, Wimmer, Willard, Brockway, and myself. Of the members present, only one, I think, would abide by the action of those present, and since then have signified their approval of what was done. After an expression from all present as to holding a convention, the Committee felt persuaded that, whatever

the views of individuals of the Committee, the desire of a majority of the Republicans of the county, was that there should be no convention called. The Committee accordingly voted not to call one.

Hendricks county had left to Putnam county the selection of a candidate for Joint Representative. It seemed to the Committee necessary to call a convention, for the purpose of nominating a candidate for Joint Representative. It was determined therefore to make the nomination there and then; a resolution was accordingly offered nominating Capt. Osborn—this was adopted unanimously. So far as I am aware, Capt. Osborn had nothing to do with bringing about his nomination by the Committee instead of by a convention; his nomination by the Committee was rather a consequence resulting from their action in deciding to call no convention. In deciding to call no convention, they supposed they expressed the wish of the Republicans of the county generally. And they have the right to make the nomination (like anything else they might do subject to the approval of the Republican party), they did not then, and do not now, doubt. That they correctly represented the wishes of a majority of the Republicans of the county in deciding to call a convention, and in nominating Capt. Osborn as their candidate for Joint Representative, they did then, and, as far as I have been able to learn from members of the Committee, still believe.

The Committee therefore consider that they alone are responsible for the position, right or wrong, in which Capt. Osborn is placed. Recognizing its broad extent, the right of the Republicans of the county to undo all that they have done in this matter, the Committee feel it their duty to stand by their action—and take it for granted that the majority of the Republican party indorse it, until the disapproval of that majority is made manifest to them. And that when the majority of the county is not satisfied with the action of the Committee, they would feel justified in calling a convention to set aside what has been done.

WM. A. BROWN,
Chairman Putnam Co. Rep. Cent'l Committee.

From Jefferson Township.

Mr. Editor:—Dear Sir: Noticing through the columns of your worthy paper that you are frequently receiving news from other parts of the county, I concluded that I would give you a word from "Old Jefferson."

With regard to politics, everything seems to be quiet here, except that there is a rumor of a coming election, but it has been rather quiet on the Potomac. But "Old Jefferson" never fails to hold her hand, and we have no reasons to fear but that when the time comes she will carry the day.

Crops are light. Wheat is considerably under the average crop; hay about the same as wheat; corn will not make half a crop as it was last year. It has been rather dry here this season to make good corn. While our neighbors around us have had good rains, we, it seems, have been forgotten.

There has been considerable interest among the people in regard to a series of debates which have been carried on by students of the law, and a long school and have returned home to spend vacation. These debates have been held at New Providence Church, near the center of the Township, and have been carried on in decency and in order. The house is crowded every night, and everybody seems to manifest a deep interest in the welfare of the students. The village of Mr. Meridian is still the impetus of Mr. Smith is having a stone house put up, which, when completed, will be a favorite resort for all who desire to purchase dry goods. Mr. A. is a fine man, and his energy and perseverance is ample guarantee for his future success. Preparations are also being made to erect a church. Work will commence immediately. The name of the denomination is "The Church of the Nazarenes." A. OSBORN, M. S., Jefferson Township, July 30th, 1870.

[We hope to hear from our correspondent often. The local news, like the above, is what we want, not long essays.—Ed.]

North Carolina.

For several weeks past there has been great excitement in North Carolina. Gov. Holden claims two or three counties have practically been in a condition of outlawry for some months; that the Ku-Klux and organized thiefs, and were raising up a new down, committing outrages and murders without number; that life and property were in constant jeopardy, and that he had in vain appealed to the better class of citizens to create a public sentiment such as would compel bad characters to keep peace. Some weeks ago he put these counties under martial law, and ordered the militia to organize the State militia of a large scale. Then he suddenly called on Col. Kirk, somewhat noted as a bold and impetuous man from Tennessee, gave him command of five or six hundred troops, sent him into Caswell and Alamance counties, where he arrested numerous citizens on the general charge that they were directly or indirectly responsible for the outrages. Application can now be made for writs of habeas corpus, but so far officers of the court have been unable to serve them. An army officer, who has been through that section on business, says that the reports which have come North of the outrages committed are by no means exaggerated. No man's life is safe who gives aid or offense to those who countenance the outrages. The citizens are powerless, and this officer thinks Holden's course the only one by which peaceably disposed citizens could be afforded protection. There are Government troops at Raleigh, Graham, the county seat of Alamance, and Yanceyville, the county seat of Caswell, and their presence, has little effect, since the only aid in particular cases under direction of civil officers, and in any special case of outlawry, offenders are out of reach before the aid of the troops can be procured. In this the sympathies of the officers of the troops are unmistakably with Gov. Holden.

Last week additional United States troops were sent to aid Gov. Holden, so that he now has ten companies of regulars at his disposal, eight of them being artillery and two infantry, and all armed with Springfield breech loading rifles. Before any troops were ordered to the State, Gov. Holden went to Washington, and in a long conference with the President and Secretary of War, fully explained the situation. Both those officers regarded it as essential that troops should be immediately dispatched to prevent outbreaks, if possible, by the moral effect of their presence, or in case of actual trouble, to be at hand to respond to the requests for aid from the civil authorities. All reports are to the effect that the officers of these troops firmly indorse the course of Gov. Holden, and will go as far in rendering aid as the mode of armament will allow. Elections take place to-day, and as these regular troops have been so widely distributed as their strength will allow, it is hoped that the elections will pass off without serious difficulty.

Crawfordsville is to have a new hotel, the result of private enterprise.

The Fort Wayne Democrat calls the Germans "the staff-fed Dutch."

A Democrat in Vigo county has executed a warranty deed for a burying ground, free to all persons except negroes and mulattoes.

The total tax levy at Jeffersonville, for city and other purposes, is one dollar and eighty cents on the one hundred dollar value. This is twenty cents more than on the one hundred dollars than the tax levy in New Albany.

The work of remodeling Springfield nuzzle-loaders into breech-loaders is nearly completed, there remaining but 2,400 to make up the 50,000. From 300 to 350 per week are remodeled.

It seems that certain aspirants for the U. S. Senatorship in Ohio, are beginning to lay the wires already for the election, although it is not to take place until two years hence. In speaking of it the Cincinnati Gazette takes occasion to express its views fully and freely on the means so often resorted to in order to secure office. Its remarks are applicable not only to the case under consideration in Ohio, but also to affairs in our own county at the present juncture. It says—

The policy of making a Senatorial campaign in Ohio at any time without consulting the people is a bad one. We do not recognize the right of any man, or any two men, to put themselves forward as candidates, and to have it understood that they are to be voted for by their party in the Legislature. This was done in Ohio when John Sherman and Robert C. Schenck were candidates, and when the former was elected. Nominations for the Legislature were made upon the issue between Sherman and Schenck, and the great majority of the candidates were required to pledge themselves in advance. The demoralizing effect of this system was apparent in the Legislature. It was a body that did no credit to the Republican party. With reference to the Senatorial question, the members generally fulfilled their contracts, and most of them received their pay; but for the more important duties of legislators, a majority of the Republican members were incompetent. The consequence was a Democratic Legislature in 1867, which elected a Democratic U. S. Senator to succeed Hon. B. F. Wade. From the demoralization resulting from that Senatorial race the Republican party of Ohio has not yet recovered; and, maybe, never will recover.

And then, what can be expected of legislators who sell their votes for money or patronage? or of Senators who purchase their election? By the latter the Senate of the United States is now controlled, and hence the corruption for which that body has become noted. The most profligate schemes pass the Senate without serious difficulty, and members hold their seats unquestioned, whose characters are notoriously disreputable. All this results chiefly from the bad practice upon which we are commenting, and which it is now sought to continue in Ohio, even at the risk of throwing the State into the hands of the Democracy, and of sending a Democrat to the United States Senate, in place of John Sherman. It is not likely that the corrupt will be confided to those who now seek to control that far off election. It is pretty certain it will not be so confined. There are many able and pure men in the Republican party in Ohio, and to the services of the best of these the public are entitled. If candidates who propose to purchase their election are to be elected upon the Republican party, the party will not be worth the candle that would be consumed in the play.

We have taken the ground heretofore that the Republican party is strong enough to effect all the reforms needed within its own ranks. To this end it must put forth its strength if it would live and succeed. For the filth that the public justly complain of, the success of the Democratic party would furnish no remedy. The party that sought to destroy the Government is not the party to trust with power under any circumstances. The great patriotic Republican party, notwithstanding the faults that have, through the influence of bad men been committed, is the only party worthy the support of the patriotic American people. This is the party of liberty, reform and progress. It is the only party that can be depended upon to hold on to and properly apply the fruits of our victories gained in the late war against rebels. Therefore a party change would be madness. All that is desirable, all that would be safe, and all that is required, are some changes in the personnel of the party. These the Republican party is strong enough and virtuous enough to bring about, and to this task we now commend our friends in the State of Ohio. This is the kind of reform that Republican voters demand. Let us begin by putting down the men who begin to lay the wires for a Senatorial election which can not occur this year, and which need not occur two years hence. Let us secure the election of good men to the Legislature in 1871, and it will free the party in the approaching campaign from entangling alliances.

Those who are at this time taking every occasion to refer to the assistance rendered to America by France in the Revolution, should take the trouble to learn the facts. The French Republic—the old and young branches of the family—have shown their friendship for this country in both of our great wars—that of 1776 and that 1861. Louis XVI. sent us military assistance in the war of the Revolution, and two of the Orleans Princes served in our army in the war against the Rebellion. But to the Napoleonic dynasty, as represented in the First and Second Empires, we can say we are much indebted. Napoleon I. could not aid Louisiana for a good round price, because he could not help it; and Napoleon III., during the late war, made repeated and determined attempts to form a military alliance against us, for our destruction. The Bourbons befriended us, and we must not lose sight of the fact: Napoleon tried to destroy the Republic, and we must not forget it. We should feel very grateful to Napoleon for the services rendered us by the Bourbon family, which he has always persecuted.

A great deal of party force is lost, and a great deal of party activity uselessly expended, through a want of proper consideration of the conditions necessary to success. If popular government is practical—if it is a system of government, there must be implanted in the popular character a sentiment which insures that the tendency of government should be continually toward the right; that the balance of its policy should be in favor of freedom and justice. That element is the moral consciousness of the people; the satisfaction of which is the condition of popular confidence.

The word "new" and "new," it has been embodied in all history, and written and transacted; it is perpetually being repeated, and perpetually being disregarded. The aspirant politician, immersed in a personal strife for office, can not learn it; the ambitious party leader, who looks upon the people simply as so many puppets, who, by the use of the proper skill, can be made to dance in one direction as well as another, whom his acceptance would remove from his favorite field of operations, can not afford to give it his adhesion.—Cincinnati Gazette.

Claim agents in various parts of the country are trying to get business out of soldiers and others entitled to artificial arms and legs under the recent acts of Congress. There is not less need for employing a single one of these agents. Soldiers can apply direct to the Surgeon General by letter, and he will furnish all the necessary blanks immediately, which each man can fill up for himself, and thus avoid the expense of an attorney. Transportation to and from the place where the limb is to be fitted is also furnished, on request, to the Surgeon General.

In view of the numerous applications made for the use of cannon for the purpose of firing salutes, etc., the Governor authorized the inspection of the guns belonging to the State. Mr. Ambrose Ballweg, who made such inspection, reports the guns now upon hand, three in number, in his opinion, unfit for use.

It is thought best, therefore, not to issue any of these guns, in order to prevent an accident that might occur in firing in their present unsafe condition.—News.

A new dodge to swindle the soldiers who survived the storm of the rebellion has been conceived by some rascally fellows in New York. These rogues are flooding the country with circulars, addressed to those who were soldiers in the Northern army. The document announces that discharged soldiers are entitled to 160 acres of land assigned them for service during the war, and that to obtain this bounty from the Government it is necessary to forward the paid for a fee of \$20 for a professional services. It is wise for the people who live in the rural districts to accept of such a thing emanating from modern Goliaths. The cities are filled to overflowing with those who, from one year's end to the other, never do an honest day's work, subsisting only by their wits. They concoct all sorts of rascally devices, and in this way manage to eke out a living by cheating the unwary.

A request having been filed with the French government to permit some of our officers, including General Sheridan, to follow the French army for the purpose of making observations, has been declined by the highest military authority and a statement made that no foreign officer or statesman would be permitted to follow the French army. If the Prussians are not more civil our men may as well come back home.

A cable dispatch says that Austria has given her sanction to the taking possession of Rome by Italy. Spain can not follow even if she wished to, which is doubtful, and the old infallible Pope's temporal power must soon cease. Sir James Mackintosh's striking prediction that the nineteenth century would witness the end of religious intolerance and connection with European governments, bids fair to be verified.

Rev. Mr. Howe, of Terre Haute, had an appointment to preach at Sibleytown. Arriving there, he found that a fight had just been concluded a short distance from the place selected for his preaching. Taking a carriage, he drove directly into the crowd and supplemented the fight with a half hour of good gospel preaching, prayer and benediction.

The school question is being agitated at Lexington, Ind. The Democratic council of that city having granted a Roman Catholic priest \$500 a year out of the public funds for the support of his sectarian school. The act is rightly regarded as the first of a series of similar wrongs.

A little boy, four years old, son of Ingram Fletcher, banker of Indianapolis, happened to find Monday in a stable. The child, with several other children, was playing in the stable, and it is supposed set fire to some hay. Dr. Bowman preached the funeral sermon on the following day.

The fighting between the French and Prussians has begun, but nothing of a serious character has yet occurred. News of a great battle is hourly expected.

MISS MARIA H. SMITH,
Teacher of Music
ON THE PIANO OR GUITAR.
Residence—West of College, Indiana Street,
Greencastle, Ind.
Aug. 1st, 1870, 31nd.

THE JENNY LIND
Silver Cornet Band
Is prepared to furnish music for the public, irrespective of party, during the coming season, and on all other occasions.
WM. HODGKINS, Corresponding Secretary,
31nd St.
HARDY'S STATION, IND.

WILLIAMSON & VOSBURGH'S
Dry Goods Department.
Among the beautiful styles of Dress Goods brought out the present season, is a variety known as *Puer Mohair*, which, for its soft appearance, far surpasses any article in the trade. These goods are of fine texture, light weight, and are admirably suited to the season, being altogether superior to Alpaca, possessing a richness and finish equal to the best Gros Grain silk. Madame Bonnet presents them a decided improvement over all other Black dress goods since Spring styles. We have already received a line of these elegant goods from the importers, and will open a second invoice in a few days.

Another lot of these elegant Grenadines just received at Williamson & Vosburgh's. They are just the thing for hot weather, and nice party dresses.

1,000 yards remnant Percales, suitable for miss' and children's summer wear. These goods are in pieces of from one to ten yards each, and sell at about half price. Call and see them.

We have just received, direct from the city of New York, the largest stock of Linen Goods offered to the people of Putnam county. Owing to the decline in gold, we were enabled to purchase these goods at a great bargain, and are now actually selling them for less money than was asked for them at wholesale less than three months ago. Such goods as Table Damask, Napkins, Towels and Crash, we have already sold in houses at prices far below what we have examined it. They make a specialty of these goods, and are selling them remarkably cheap.

"What an elegant stock of Queensware!" We hear this exclamation many times every day; and no wonder, for we have given this branch of our business special attention. In addition to our usual Spring stock, we have just received five crates of Meakin Brothers' celebrated goods; also, a number of sets of elegant French China. For eight years past a nice set of China has been considered a luxury altogether too expensive to be indulged in, but the recent heavy decline in gold has enabled us to procure and offer these goods as low as they were before the war.

We are the manufacturers' agents, and have just received a large lot of remnant Bleached and Brown Domestic, which are selling very considerably lower than the regular goods. We desire to call your special attention to a lot of long yard wide, Sea Island Cotton; 1 1/2 and 1 3/4 yards wide. Great bargains in these goods, at Williamson & Vosburgh's.

In Linen Handkerchiefs, Paper Collars, Cravats and Ties, we keep all the latest novelties.

We shall keep our stock full and complete throughout the season, and will positively guarantee our prices as low as those of any other house in the trade. We invite you to call and look through our stock, and will promise to use our best efforts to treat you well and sell you cheap goods.

WILLIAMSON & VOSBURGH.
16-17

There is a new hotel, the result of private enterprise.

A. J. Hall and T. G. Bowman are happy.

Remember the Sunday School picnic next Saturday at Bradshaw's school house in Clinton township.

Mr. Briggs, of the Press, left this morning to spend two weeks with friends in West Virginia.

A number of our citizens are seeking health and recreation at the North, among them Robert Renick and J. D. Hutchings.

Rev. Dr. Fisk has returned home, and will fill the pulpit at the Presbyterian church next Sunday morning at 10 1/2 o'clock.

J. W. Culley, of this city, has been appointed Superintendent of the public schools of Danville, and will shortly remove to that place.

The reunion of the Yeates family will take place on the farm of William Dale, one mile east of Summerset church, instead of the place mentioned last week.

A number of probationers will be received into full membership at Roberts Chapel next Sunday. The ordinance of baptism will be administered.

We have been "corned" again by Joe. Crows are proverbial for their fondness for corn, and we suppose this accounts for Mr. Crows' success in raising the article.

MARRIAGE LICENSES.—Isaac Stansberry and Martha Summers; William Barry and Mary Murphy; Jacob I. Mullis and Sarah Wille; George W. Mullis and Julia Higgins.

Gen. Colburn's appointment for Mt. Moriah is for 2 o'clock in the afternoon of Friday, August 12th, instead of 7 p. m. We urge the citizens of that part of the county to be present promptly at that hour.

In giving the names last week of the members of the Central Committee who were present when the nomination was made for Joint Representative, we failed to get the names of Alvah Brockway and Volney Smith, both of whom were there.

A subscriber writes us that the verses, a copy of which we published last week, inscribed on the Clay monument, were written by George W. Cutler and not by George D. Prentice. By a reference to Cutler's Poems, page 65, we find this is correct.

The Banner office acknowledges the compliment of a serenade from the Jenny Lind Cornet Band, of Hamrick's Station, Saturday evening. This band is now prepared to furnish music for all occasions, on short notice.

Rev. O. H. Smith, who is well known to our citizens, has resigned the Presidency of Rockport Collegiate Institute, where he has labored for the last four years with marked ability and success. He is now filling the chair of mathematics in the Indiana State Normal School, Terre Haute, with efficiency.

Prof. E. P. Cole, of Bloomington, has been chosen by our School Trustees as Superintendent of the public schools of this city for the ensuing year. Prof. Cole has the reputation of being a fine scholar and a good disciplinarian, and we trust his residence in Greencastle will be profitable both to himself and pupils. We believe a full corps of teachers has now been selected.

Last week A. R. Brattin received a letter from Paris, Tennessee, ordering a pair of gold Periscope spectacles to be sent by express to the writer, who stated that he had learned that they were the best in use. The order was promptly filled.

This incident shows how our business men may extend their reputation and business, and at the same time attract attention to the city. Energy, perseverance and printer's ink does the work.

REAL ESTATE TRANSFERS.—James M. McKinney to Gerhard Eshman et al., 160 acres in Madison tp., \$3,500.

Osway Allen et al. to Thomas O. Allen, lots 4, 5 and 6, in Keightley's Subdivision, Greencastle, \$500.

Nelson Wood to Willis G. Wood, 40 acres in Madison tp., \$1,000.

Hiram M. Wilson to D. L. Southard, part of lot 76, E. Greencastle, \$1,500.

Charles Talbott et al. to William Call, 393 acres in Monroe tp., \$1,800.

The Building Committee of Asbury University met in this city Tuesday evening, there being present, in addition to the resident members, Col. H. S. Lane, of Crawfordsville, W. C. De Pauw, of New Albany, J. C. McIntosh, of Connersville and W. F. Browning, of Bloomington. The Committee unanimously resolved to proceed with the work at once, on the site heretofore selected in the grounds immediately east of the present building, and the original plan will be carried out as nearly as practicable. The foundation will be put in so as to lay the corner stone during the session of the State Conference at Indianapolis the coming October, and that body is expected to be present at the ceremony.

Base Ball.

BASE BALL AT CARPENTERSVILLE.

Mr. Editor: The match game of base ball between the Ladoga White Stockings and the Carpentersville Club came off Saturday, July 30th, and resulted in the defeat of the White Stockings. The score stood as follows at the close of the ninth inning:

Team	Runs	Hits	Errors
White Stockings	6	12	0
Ladoga White Stockings	2	10	1

Flies caught—White Stockings: McGinness, 2; Smith, 1; Funk, 2; Call, 1; J. Gill, 1; Powell, 1; Carpentersville: Cline, 2; D. Patton, 1; H. Brown, 1; A. Dodd, 1; Short, 2; Foul caught—White Stockings: 7; Carpentersville, 12.

Umpire, Dora Goff; Scorers, T. B. Toffing and T. Venard. CARPENTERSVILLE, Aug. 1, 1870.

RED STOCKINGS, JR. VS. ATHLETES.

The above named clubs played a match game of base ball near the Fair Grounds adjoining this city, on Saturday, July 30th, which resulted in the victory of the Athletics by a score of 61 to 34. The playing of the Red Stockings was not up to the usual standard. J. Darnall, short stop of the Athletics, played his position splendidly. A. Daniels, of the Reds, at first base, was very good. The following is the score:

Team	Runs	Hits	Errors
Red Stockings	3	10	0
Athletes	61	12	0

Fly catches—Reds: Denn, 2; C. Browder, 1; W. Browder, 1; Walls, 2; total, 6. Athletics: J. Darnall, 4; McKee, 3; Dale, 2; Gordon, 1; Allison, 1; total, 11.

Home runs—Reds: C. Browder, 1. Athletics: Farrow, 1; J. Darnall, 1.

Umpire, James Parnes; Scorers, George Gifford and Geo. W. Starr.

Time of game, two hours and thirty minutes.

PUPPINS VS. RED STOCKINGS, JR.

The Puppins, having lately reorganized, played a practice game Monday afternoon with the Red Stockings, with the following result: Red Stockings, 26; Puppins, 11.

BASE BALL SONG.

How dear to the heart is the green-covered ball, Where good rival captains their men rightly place, The pitcher, the catcher, the right field and left field, The good men, the true men, who guard well each side.

The short stop so lively, the center-field handy, The ball, and the striker who aims to send high, But dearer than all to the hearts of the boys, Is the leather-clad base ball, we catch on the fly—The jolly old ball, the well-covered ball, The leather-clad base ball we catch on the fly.

LOCAL NOTICES.

NOTE.—Those notices will not be inserted for a longer time than one week, and will be charged for each insertion. Six weeks make a line.

Fruit Jars cheap at Lyon & Weik's.

The usual attractions for the ladies can still be found at Mrs. Pottoir's Fancy Emporium. She is selling goods cheap for cash.

The Champion Reaper and Mower having gone into winter quarters, resting upon its laurels, is succeeded by the Champion Sash Lock, which is undoubtedly the best, most durable and convenient Sash Lock in the market. For sale at Blal-ey's Hardware Store.

A resident of Indianapolis, happening to be in our city recently, visited the Furniture establishment of Kimble, Sherfy & Co., and examined their goods and prices. Returning to Indianapolis he made a similar examination in the furniture houses there, and then came here and bought an office and a chamber set from Kimble, Sherfy & Co., because, as he claimed, it paid him to do so. The sales of this house last Thursday amounted to over \$450.

Mr. Editor:—Dear Sir: I deem this not only a duty I owe to Dr. Allen, of Indianapolis, but also to those who may be endured the dark and gloomy lot of blindness, which has been mine. For years I have not known the joy of eyesight, until since the last operation upon my eyes by the Doctor. He had once operated on them, but owing to unavoidable causes the sight was not restored; and in my gloomy condition I was advised by malicious enemies of the Doctor to prosecute him for the failure. But the Doctor assured me that I could be cured, although all other physicians gave me no hope and said a cure was impossible. I now owe my sight and happiness to the Surgical Institute, and I cannot refrain, for the sake of suffering humanity, from saying that wonders are performed there in the science of surgery, and any statements the doctors there make can be implicitly relied on, as they, I believe, are honorable and Christian gentlemen, devoted heart and soul to a great work, and are above the petty jealousies and animosities of the common professional men, and have abundant business to occupy the time without it. While there I saw others as happy in relief as myself.

FINLEY'S IMPROVED WAGONS.

What a Practical Man Thinks of Them.

GREENCASTLE, IND., July 25th, 1870.

Mr. A. Finley—The wagon that I purchased of you some months since has been subjected to a pretty severe trial at various farm work, such as hauling rails, lumber, wood, milling, etc., and it has proved very satisfactory. The front gear is quite an improvement. The movement of the front wheels to the right or left in turning is much easier than in the ordinary wagon. The weight of the tongue on the necks of the team is very light, in consequence of the weight of the double-trees resting entirely on the front hounds. The coupling is certainly a great improvement. As you have been the inventor of such important improvements to the farm wagon, I trust you can but meet with the most satisfactory success in their manufacture and sale.

Yours truly,
A. C. STEVENSON.

Culver's Drag Saw.

ROCKVILLE, Ind., Aug. 1870.

The undersigned were present at a trial made by the proprietors, James R. Lambert & Co., on the 9th ult., in Alex. Puett's woods pasture, near this place, of J. D. Culver's Patent Iron Drag Saw. The tree used was a solid white oak, averaging 20 inches diameter. Thirteen cuts, eighteen inches long, were each made in 1 minute and 40 seconds. The trial was made under very unfavorable circumstances, the ground being soft and muddy. The saw worked with ease, clearing itself completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think the machine completely of the dust, and without any appearance of choking. This machine is simple in its construction, durable in material, easily moved and hauled, and is so arranged that with one setting of the power, the tallest tree can be sawed in any desirable lengths from butt to top. We think
